Paragraph Some more text.

Subparagraph Even more text.

2 Topmetal-II$^-$ analog readout

Topmetal-II$^-$ is a charge collection chip with 72 * 72 pixels.

$$f(x) = x^2 \tag{1}$$

The above equation denotes the input and output relationship of Topmetal-II$^-$ The figure environment takes care of the numbering and positioning of the image within the document in order to include a figure, you must use the includgraphics command. It takes the image with as an option in brackets and the path to your image file. As you can see. The figure environment takes care of the numbering and positioning of the image within the document in order to include a figure, you must use the includgraphics command. It takes the image with as an option in brackets and the path to your image file. As you can see. The figure environment takes care of the numbering and positioning of the image within the document in order to include a figure, you must use the includgraphics command. It takes the image with as an option in brackets and the path to your image file. As you can see. The figure environment takes care of the numbering and positioning of the image within the document in order to include a figure, you must use the includgraphics command. It takes the image with as an option in brackets and the path to your image file. As you can see. The figure environment takes care of the numbering and positioning of the image within the document in order to include a figure, you must use the includgraphics command.
